Why EasyPMS

1

All In One Solution

EasyPMS is the most comprehensive cloud hotel management solution on the market; it is a full PMS including booking engine, channel manager, rate manager, POS, and other additional modules. It has all the features and functions your hotel may need.

4

Cost Effective & High ROI

EasyPMS has cloud hosting and SaaS license therefore it does not need any server, expensive licenses nor any maintenance or upgrade costs. That is why it is very cost effective and has the highest ROI.

2

Cloud and Web Based

EasyPMS is hosted by Microsoft Azure and can be used by any web browser therefore it is accessible from any computer or mobile device anywhere in the world. Compared to on-premise systems, it is much more efficient due to its on-the-go accessibility.

5

Reliable

EasyPMS is hosted in Microsoft Azure Cloud Servers that may be the most powerful and protected data centers in the world. It is backed up in more than 24 points in the world.

3

Latest Technology

EasyPMS uses the latest technology (Google's Angular Framework, Reactive Web Programming, and NodeJS) that is why it is extremely fast, efficient, and compatible with all devices and browsers.

6

Secure

EasyPMS uses SSL for data transfer, secure tokens for authentication mechanisms, and several AI guard algorithms for malicious attacks. It is one of the best protected systems in the world.

PMS?

7

Easy to Use

Since EasyPMS uses Google's Material Design which has a very familiar interface, it is both user-friendly and easy to use.

10

Multi Property

EasyPMS has many special functions and reports for group hotels and chains. It provides shared consolidated reports for occupancy, income, ADR, and aggregation of financial statements. It also provides shared use of information about guests, agencies, and reservations.

8

Mobile

It is completely responsive and fully functional on tablets and phones in addition to desktop systems.

11

Scalable

Since it is hosted in cloud servers, CPU power and storage capacity can be easily expanded or decreased depending on your needs.

9

Customizable

EasyPMS is easily customizable for any size and type of hotel due to its flexible parameters.

12

Interoperable

EasyPMS has a public API for communication with other systems, so integration to other external systems such as banks, door locks, and pay tv etc. can easily be done.

13

Enhanced Support

EasyPMS has 24x7 online support; an expert will be with you looking at the same screen anytime you need.

Daily Status

- Daily status window provides all critical information about the hotel on a single screen.
- **You can view your hotel's occupancy, revenue, forecast, even call center notes both in graphs and lists.**

Reservation List

- You can list, sort, group, and filter all of your reservations by any criteria with a single click.
- **By the help of color codes, important information becomes more visible.**
- All functions are accessible with a single click after selecting a single line or multiple lines.
- **All screens can be exported to Excel or to the printer in different formats.**
- In the listings multiple sorting, filtering, searching, grouping are standardized.
- **Thanks to its digital archiving capability, one or more documents can be stored in the related record by scanning or uploading.**
- Users can view only the allowed screens and run the allowed functions depending on their authority.

The screenshot displays the EasyPMS interface. At the top, there's a navigation bar with icons for Status, Prices, Forecast, Rack, Blocking, Reservation, In house, FreeCash, Booking, POS, and Tasks. The main section is titled 'Reservation List' and shows a table with columns: Room No., Room State, Room Type, Given Type, Agency, Guest Name, Voucher No, Arrival, Departure, Board, Yip Type, Oda, Adult Tchd, Room Price, Currency, In Trace, Attachments, and P. Res Id. The table lists various reservations with different states like 'Clean', 'Confirmed', 'Touched', 'Dirty', etc.

Below the table, a 'Reservation Card' is shown for a specific reservation. It includes details like Agency (ONLINE), Invoice No (54F357H), Check-In (24/8/2019), and Check-Out (29/8/2019). The card is divided into tabs: Guests, Pricing, Folio, Other Details, Notes, and Request/Complaint. The Pricing tab is active, showing a table of room rates and a total price of 490.00.

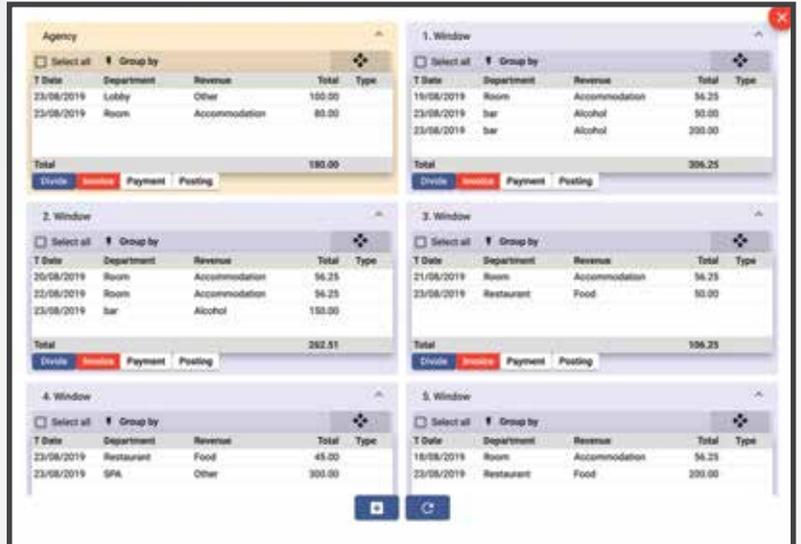

Day	Room Type	Board Type	Room	Adt.	E.Chld.	V.Chld.	Rate	Fix Price
24/08/2019	Std	BB	1	2	0	0	98.00	
25/08/2019	Std	BB	1	2	0	0	98.00	
26/08/2019	Std	BB	1	2	0	0	98.00	
27/08/2019	Std	BB	1	2	0	0	98.00	
28/08/2019	Std	BB	1	2	0	0	98.00	
29/08/2019	Std	BB	0	0	0	0	0.00	
							490.00	

Reservation Card

- All details about the reservation are in one place.
- **No more duplicate guest profiles. Auto guest lookup feature finds old profiles and puts them together.**
- There is access to room type availability for the current reservation period with a touch of a button.
- **It has the ability to block rooms with one click.**
- It has unlimited profile recording ability.
- **There is authority control for access to the pricing tab; all data related to pricing is in one place.**

Folio

- Since payment, posting and invoicing can be done by a touch of a single button, it saves times.
- **Transactions can be entered in different currencies and it provides automatic conversion.**
- The room folio can be distributed to many different windows and each window can be separately billed.
- **Different types of folio print outs can be taken.**

Room Calendar

- It is designed in such a way that you can perform the entire operation of the front office (Reservation, Check-in, Check-out, Folio, Blockage, Payments)
- **You can access the guest's reservation card, change room and date with a drag and drop, make collections, check-in/check-out transaction entry, and go to the folio.**
- You can easily drag and drop a reservation around to modify its room number or accommodation range.
- **You can also see your reservations from the online channels that yet not have been assigned a room on top of the blockage screen and drag and drop them to the suitable room.**
- The number of empty rooms is displayed at the bottom of the room type and the full occupancy can be seen on top of the chart.
- **On this same screen, online channels can be managed and POS transactions can be processed.**

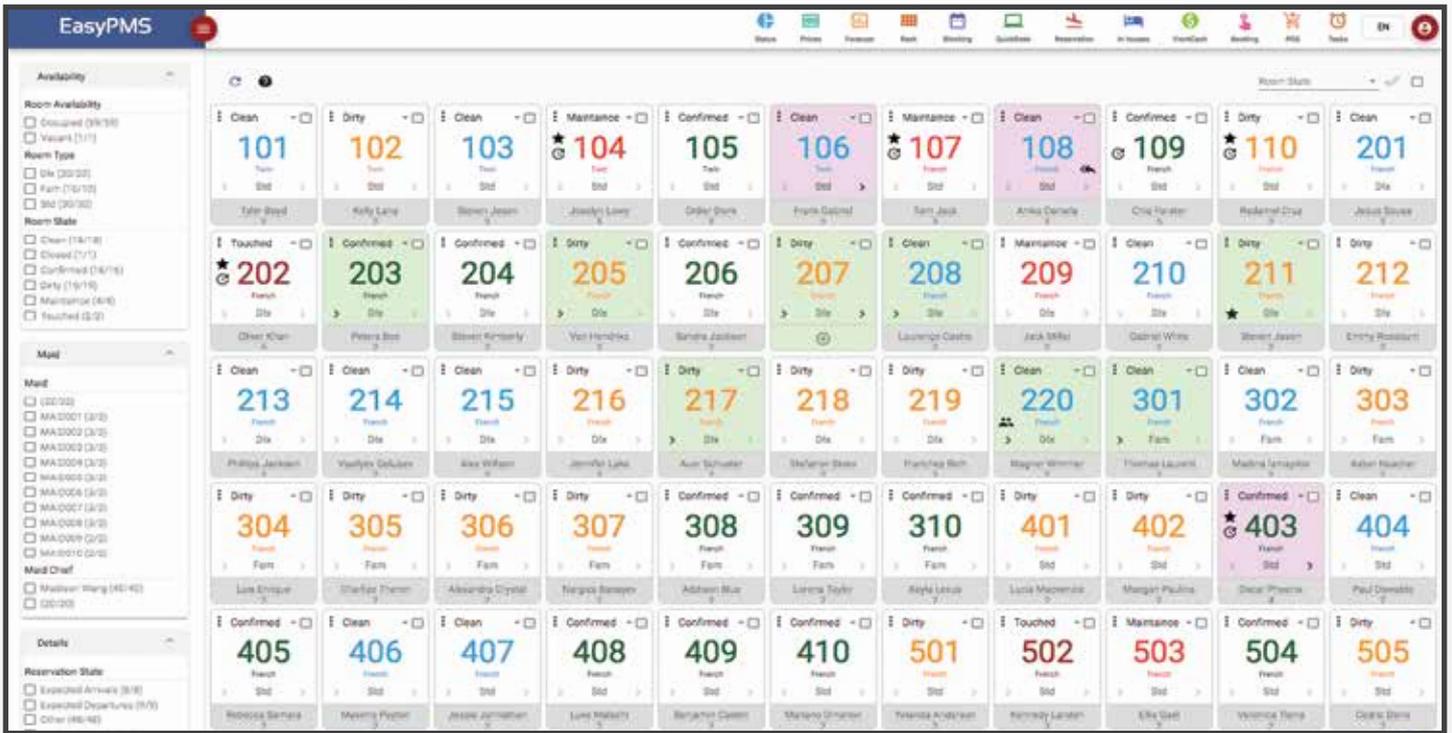

8. Date	Room Type Name	Single	Double	Triple	Single Sold	Double Sold	Triple Sold	Single Remaining	Double Remaining	Triple Remaining

29/07/2019	Std	5	5		5	5				

Sales Project

- **You can monitor all your sales projects on a single screen.**
- You can follow up corporate/company meetings, offers and contracts, collective reservations and banquet sales, and make income analysis.

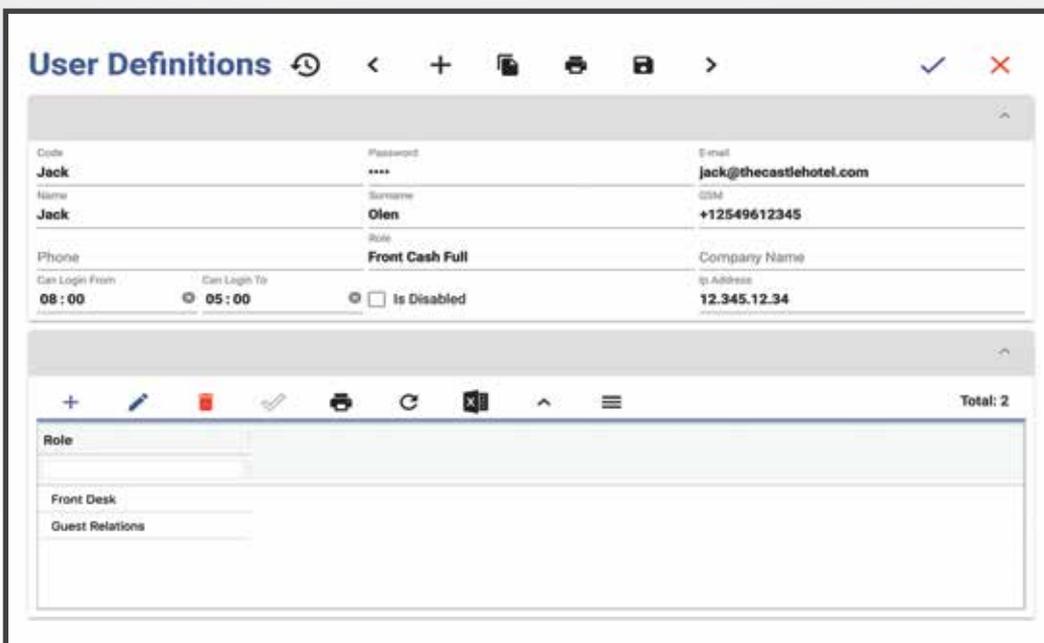

Room Rack

- You can view instant room statuses and color code them according to cleanliness and occupancy on one screen.
- **You can easily filter the displayed rooms, access arrivals, departures, and in-house information.**
- You can get payments and do folio and checkout operations on the room you selected without leaving this screen.
- **You can label rooms using visual icons for VIP and late check-in and check-outs.**

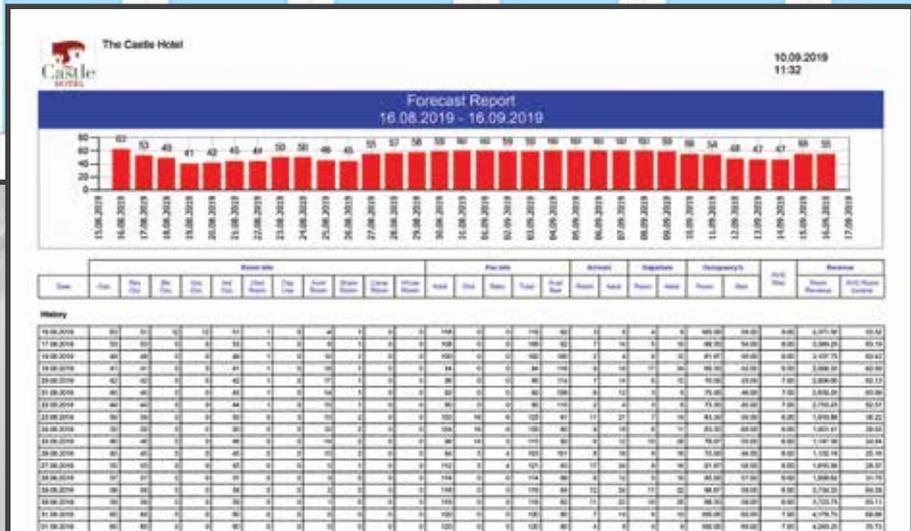

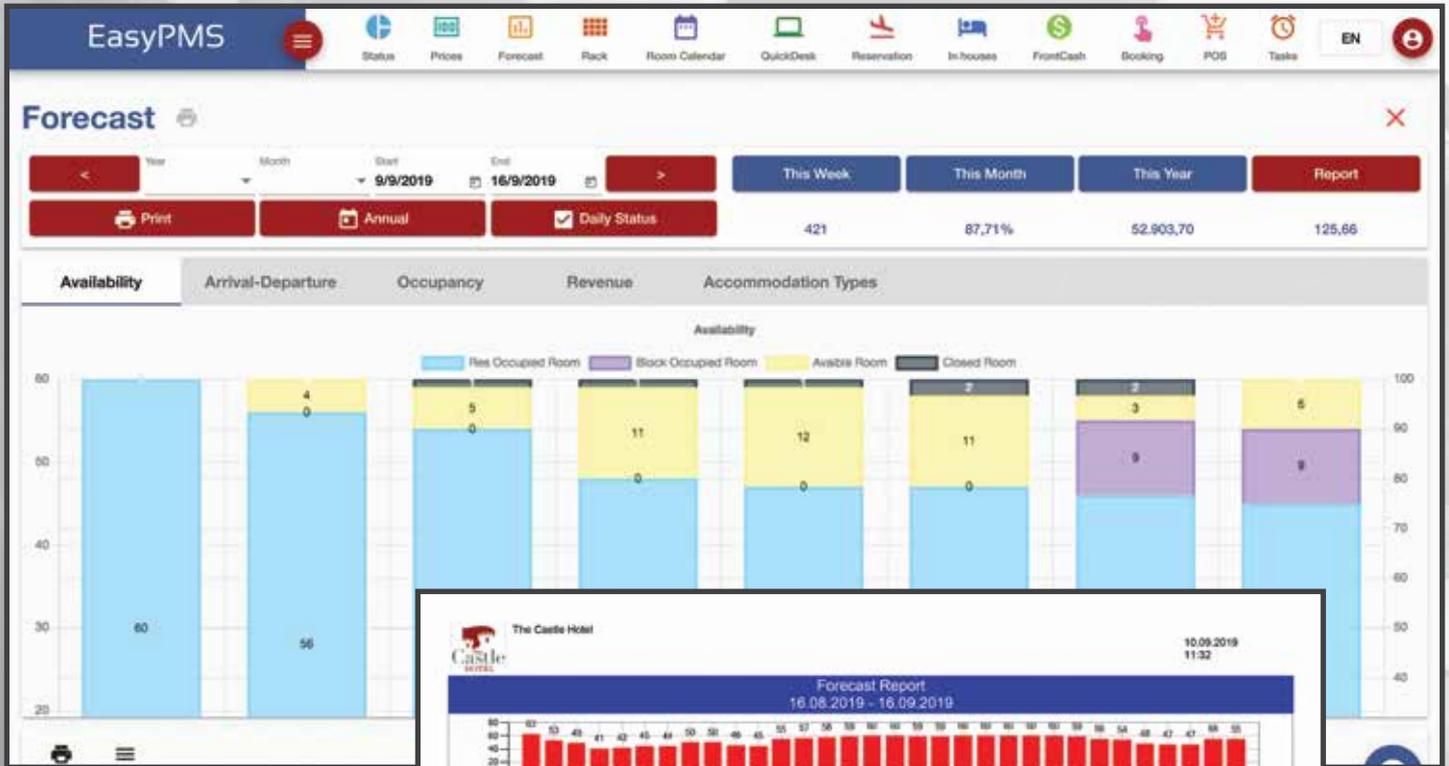

Detailed Authorization and Logging

- By defining roles to users, you can easily limit their visibility and transaction privileges on all screens.
- **You can also use logging feature to track all changes made on IP and user basis.**

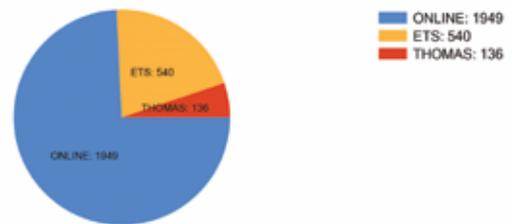

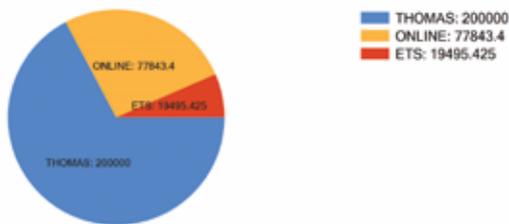

Forecast & Analysis

- It shows the occupancy, activity, income, and ADR graphs for the selected time period.
- **EasyPMS allows you to get forecasts based on every detail you enter on the reservation card.**
- You can see past and future occupancy information with a single button.
- **You can access all the statistical information about the agencies, income and accommodation all on one screen.**

CRM - Guest Relations

- All requests and complaints entered get included to the automatic task management.
- **The expected completion time is determined according to the definition of the task, the department, the authority, and the importance.**
- The task falls to the screen of the relevant unit or mobile device. The person receiving the call starts by pressing the “start task” button and ends by pressing the “complete ” button.
- **If the task is not scheduled and/or does not end in the max time frame, the message is automatically sent to a higher authority.**
- The transactions related to the guests can also be tracked through the reservation card and if requested, it automatically reminds you these transactions during check-in, check-out, folio, and invoicing.
- **Operations like VIP, setup, and prepay control get defined both as a reminder and as a task to the relevant section.**

The screenshot displays the EasyPMS software interface. The main window is titled "Inhouse List" and shows a list of rooms and reservations. Overlaid on this are two windows:

Housekeeping

- You can carry out all housekeeping processes in a digital environment.
- You can instantly update your rooms dirty-clean and minibar statuses, make an efficient job distribution to your housekeepers, and make performance evaluations easily.
- There is automatic and/or manual drag-and-drop distribution of the rooms among the maids.

The screenshot displays the EasyPMS interface. The main window shows the 'HK Room Operations' table with columns for Room No, Status, Room Availability, Room Type, Maid, Chef, Floor, Location, Guest Name, Pax, VIP, Departure, and Arrival Pax / Arrival VIP. A modal window titled 'Maid Management' is open, showing a grid of room assignments for various maids (MAID001 to MAID007). Each maid's section includes a 'Room' count, a 'Select All' button, and a list of rooms with their status and assigned maid.

Payment Processor

EasyPMS has a built-in payment processor with PCI DSS certification. You can get secure online credit and debit card payments.

EasyPMS supports different payment methods such as On-Site Payment + On-Site Deposit + Credit Card + Points.

Booking Engine & Channel Manager

EasyPMS has an integrated booking engine that can be used by guests and travel agents both on the web and on mobile. For group hotels and chains, central reservation system can be used as a booking engine.

It also has a built-in channel manager that is connected to all major online travel agents such as Booking, Expedia, HotelBeds, as well as metasearch engines like Trivago, TripAdvisor, and so on.

EasyPMS channel manager does not only synchronize online channels but also receives the reservations in the hotel. That is why it is much easier and more effective.

EasyPOS

- **EasyPOS can be used in different types of properties such as hotels, restaurants, bars, retails, and more.**
- Order taking, preparing, and serving processes can be followed and performance analysis can be done.
- **EasyPOS can be used as an app on mobile devices and on the web browser.**
- It provides digital menu and online ordering functions for the guests.

With EasyPOS You Can:

- Create advanced orders with custom notes, grouped items, and more
- **Generate and print custom designed receipts and invoices**
- Set custom prices on demand and apply discounts using a certain percentage or a fixed amount

Rate Manager

- With EasyPMS rate manager, you can analyze the prices of your competitors in all sales channels and determine the most optimum price to maximize your profit and occupancy.
- **Early booking reservation discounts can be automatically calculated according to occupancy rate of the period.**
- Automatic discount calculations can be formalized for daily reservations according to the time of the day. For example %10 decrease for every two hour after 16:00 etc.
